Tests are considered field wells if located less than .5 mile from a producing well. Near wildcats are drilled .5-1.5 miles from production and, if successful, are called extensions. Far wildcats, over 1.5 miles from production, usually discover new fields. Reworked wells listed in the body of this report are included in this table only if they are former dry holes converted to producing wells. Production figures are estimated. Well totals may not add up and are subject to change because of unclassified wells being held temporarily confidential at the operator's request.

**TABLE IV**

\* Issued by the Office of Mines and Minerals, Department of Natural Resources, Springfield, Illinois, 01/01/2000 to 06/30/2000.

## WELLS REPORTED FROM 01/01/2000 TO 06/30/2000

Abbreviations used are listed inside the front cover. A field well is less than 1/2 mile, a wildcat near (WN) is 1/2 to 1 1/2 miles, a wildcat far (WF) is more than 1 1/2 miles from production. For producing and injection wells the productive or injection interval(s) and top(s), if available, are listed. For dry holes, the deepest formation and top, if available, are listed.
